

Your New Recycling Bin

Starting in October 2008 the Automated Collection Truck will begin collecting your new "Wheelie" Recycling Bins. You will find that using your "Wheelie" recycling bin, is as easy as

1 2 3 ...

1
COLLECT

Collect all your recyclable materials using your blue box in the home!

TIP: For a detailed list of acceptable and non-acceptable materials, refer to the label located on the lid of your new "wheelie" bin!

Empty your blue box and fill up your "wheelie" bin!

TIP: Just place all the recyclable items loose in the bin. Do not bag or tie anything to help us separate better with the exception of plastic bags and shredded paper which should be bagged before being placed in the bin. Keep the lid closed at all times.

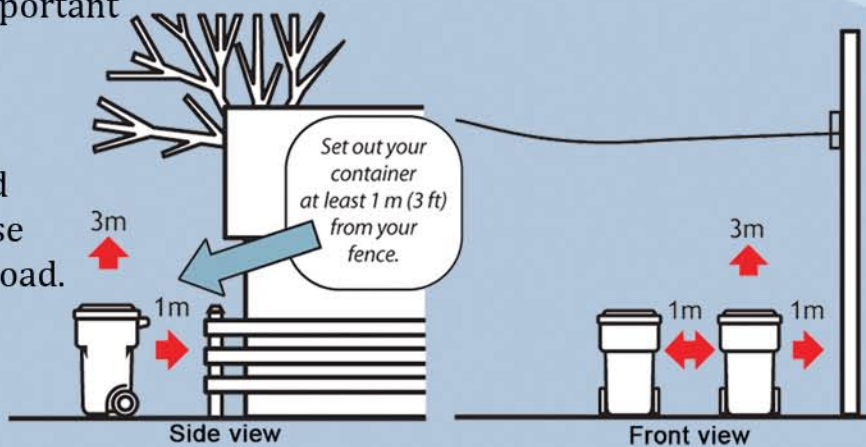

Record your "wheelie" bin serial number for reference. Alternate bin sizes are available upon request.

2
EMPTY

3
SET OUT

Set out your "wheelie" bin at the curb when full (or almost full).

TIP: Proper placement is very important to ensure trouble free service. Set out your new "wheelie" bin **at least 3 feet** (1m) away from other objects with the wheels and handle pointing towards the house and the lid opening towards the road. If you have excess or oversize materials take them to the convenience depot at the landfill.

If you have ANY questions or concerns about the program, or your "wheelie" bin, please visit our site at www.bra.org/automated

where you will find useful information on all aspects of the automated collection program. Alternatively, feel free to contact us at the Bluewater Recycling Association through one of the many methods outlined below.
