

# THE BLUEWATER WEBSITE

## Bluewater Recycling Association [www.bra.org](http://www.bra.org)

One of the objectives for our website is to bring the communities under our program closer through a vast library of resources. Users can find helpful information on what can and can't be recycled, special composting tips, and answers to the many questions surrounding co-collection pickup. There are four sections within the website which include Organization, Recycling, Composting and Waste. Each area expands into a wide range of information on the particular subject.

## A Beaver's Tale - Education Guide [www.bra.org/curriculum](http://www.bra.org/curriculum)

Our classic education guide, titled 'A Beaver's Tale' has been converted to the internet! Both adults and children have enjoyed the vast amounts of information provided by our very own recycling hero! Visit the online version and watch as Brewster Beaver battles Hughdir T. Rat and teaches the importance of recycling! Each area is labeled in the easy to follow menu, and they lead to .pdf files of the entire package, including all of the fun mini-games!

and teaches the importance of recycling! Each area is labeled in the easy to follow menu, and they lead to .pdf files of the entire package, including all of the fun mini-games!

'A Beaver's Tale' is fully illustrated, and brought from black and white to full and vivid colour!

We are very excited to release this book and hope the community enjoys it as much as we do!

## Electronic Waste Program [www.bra.org/ewaste](http://www.bra.org/ewaste)

The Information Age has created an electronics industry that is the fastest growing manufacturing industry in the world. With this growth comes rapid product obsolescence resulting in an ever growing waste stream consisting of electronic waste. Our Electronic Waste pages are intended to inform those interested in the benefits of properly recycling electronic waste, and where you can effectively do it. In addition, we try our best to give accurate estimates on the cost of bringing in various items such as TV's, computers, telephones and fax machines. This section also has important dates for special collection days if they exist.

## The Green Cone Digester [www.bra.org/greencone](http://www.bra.org/greencone)

If you noticed earlier in the newsletter, we devoted a page to the green cone digester. This is because we feel composting is an extremely important and beneficial activity to do. If you have decided that the Green Cone is a good idea for your family, then visit our section of the website which focuses on assembly, installation, methods of use and troubleshooting. You should have no problem with the green cone after reading the sections of this website!

We have gone out of our way to create this section of the Bluewater Recycling Association's website to try encourage the community to take advantage of both the great price of the green cone, and the overwhelming benefits of compost.

We have a fantastic deal with a supplier which we gladly offer to all our residents. Visit the 'Purchase a Greencone' area for information on how to obtain a Greencone for your own yard!

As the saying goes, "It eats the food you don't!"

## Automated Collection Program [www.bra.org/automated](http://www.bra.org/automated)

One of the main attractions of the Automated Collection page is the area that will be affected first: St. Marys. We are taking great strides to smoothly implement the system in the area, and so there will be a lot of feedback, information and FAQ's regarding the shift. The Website covers all the basic questions one could have, and also includes set out tips, and general information on the program itself. There is valuable information on the new trucks, the two sizes of recycling carts, and future plans.
