Aluminum and Steel Beverage and Food Cans, Empty Aerosol Containers and Empty Paint Cans, All Metal Lids.

Did You Know?

The Bluewater Recycling Association recycles over 2,000,000 pounds of material **every month!** People often wonder where all this material goes after it has been recycled and bundled. We have made a page on our website that lets you know exactly what the recycled material can be made into! For example, aluminum cans can make new cans, or compact discs. To find out more, visit <http://www.bra.org/whatbecomes> and see for yourself what happens to materials such as plastic, glass, paper, steel and boxboard. You will be amazed at the various products that can be made from 100% recycled materials. And of course, you have yourself to thank for this!
