## Who Are We?

The Bluewater Recycling Association is a unique rural based non-profit organization developing and maintaining facilities on behalf of, and in cooperation with the municipal sector. Truly, we are a cooperative of 20 municipalities working together in southwestern Ontario. In essence, the 150,000 people in 70,000 households serviced by the Association are indirectly our owners as well.

The Association is one of the largest multi-material resource management municipal cooperative organizations in Canada who provides integrated waste reduction and environmental services ranging from collection and processing to marketing superior quality products and services.

The 68 people employed by the Association handle more than 30,000 tonnes of material yearly, which represents a substantial portion of the overall waste stream. We are regarded as a leader in the industry when it comes to comprehensive waste diversion and cooperative marketing.

Did you know that since 1989 we have recycled nearly half a billion pounds of materials!

### Bluewater Recycling Association Fall 2010 Edition
